

MEDICATION DISPOSAL INSTRUCTIONS

Unneeded medications should be disposed of in special ways to ensure that pets, children, and other people cannot consume them. However, you should not flush your medication down the toilet. Instead, the best way to dispose of your medication is through a medication take-back program. Talk to your pharmacist or contact your local garbage/recycling department to learn about take-back programs in your community.

See the FDA's Safe Disposal of Medicines website (<https://www.fda.gov/drugs/safe-disposal-medicines/disposal-unused-medicines-what-you-should-know>) for more information if you do not have access to a take-back program.

Throw away the empty dispensed product container in a sealed plastic bag in a place where children and pets cannot reach it.
